* EnergySage calculates the values above based on: values provided by installers for each quote, installer-estimated loan terms assuming good credit history, the electric bill information you provided, historical market utility rate data, an energy cost inflation estimate of 7.1% (source: EIA 10-year CA avg.), and [carbon conversion factors provided by the US EPA \(Environmental Protection Agency\)](#). These calculations do not currently account for time of use electricity rates, which may impact the economic value of solar energy relative to energy purchased from the electricity grid. Check with your utility about rates and fees that may apply to your solar installation. Our savings estimates don't account for utility net billing policies or fees that may apply to your solar panel installation. Actual savings will depend on how much electricity your solar panel system generates, your energy consumption, and more. [Learn more about net billing & how it impacts solar savings.](#)

Have you made a decision about going solar? Let us know!

Tell EnergySage you're done shopping to close out your account and let installers know of your decision.

Make an impact.
It's never been easier.

We developed our one-of-a-kind marketplace with funding from the U.S. Department of Energy to make clean home energy solutions affordable and accessible to all.

Our offerings

- Home solar
- Home batteries
- Heat pumps
- EV charging
- Electricity plans
- Find an electrician
